

Tracker Alignment

Prepare to perform the alignment procedure for the 3D tracker:

- Check that the **GRIP Chair** is installed with the seat back deployed and the **Chest Marker Support**, **Hand Marker Support** and **Head Marker Support** are attached with velcro to the **GRIP Chair** as shown.

Note: Alignment of the **Chest Marker Support** on the backrest is critical. Please ensure that the top edge of the **Chest Marker Support** is aligned with the top edge of the backrest with the cable exiting to the right side of the chair (subject's right side when seated facing the **Tracking Cameras**).

- Check that the field of view of the **Tracking Cameras** is free of obstructions.

Press '**Start**' to perform alignment.

Tracker Alignment Running

Follow the instructions on the screen.

HMD Assembly

- Attach the *Head Marker Support* to the front of the *Virtual Reality Headset* as shown:

- Secure with velcro straps on top and bottom.
- Attach the small junction box on the *Head Marker Support* cable to the top strap of the *Virtual Reality Headset*.

Note: Alignment of the Marker Structure to the *Virtual Reality Headset* is critical. Please ensure that the structure is parallel to the front face of the *Virtual Reality Headset*.

Press 'Next' to continue.

Objects Pre-Positioning

Place the objects as shown to prepare for experiment execution:

- Replace the Cushion on the **GRIP Chair**.
- Temp stow the **Virtual Reality Headset**, the **Hand Marker Support** and the **Chest Marker Support** to the right side of the **GRIP Chair** (subject's right side when seated facing the **Tracking Cameras**).

- Ensure that the **Marker Array Cables** and **VR Headset Cable** pass behind the **GRIP Chair**.

Press '**Next**' to continue.
