

Visual-Visual

Press 'Next' to begin.

## *Step 1: Straighten Head*

- If your head is laterally tilted with respect to the trunk, the halo will be red:

- Slowly straighten your head on your shoulders. This will make the halo turn progressively from red to green:

- When the halo pops to bright green, hold this position.

## *Step 2: Acquire the Target Orientation*

- Once your head is aligned with your body (i.e. when the halo is bright green), a line of balls will appear at the end of the tunnel, representing the target orientation.

- Memorise the target orientation.

### *Step 3: Tilt the Head*

- If the tunnel turns red, you must tilt your head to a new orientation. The arrow tells you which way to rotate the head.

- Roll your head from side to side until the tunnel turns bright green and hold this position.

### ***Step 4: Align to Remembered Target***

- With the left hand use the Remote Control to align the virtual tool to the memorised target.

**Note:** *Press and hold the right and left arrows on the remote to rotate the virtual tool clockwise and counter-clockwise, respectively.*

- Press the center button on the remote to validate your response once you think that the virtual tool is aligned with the memorised target.

### *Step 5: Check Response*

- In some of the trials a line of target balls will be projected from your hand towards the targets, allowing you to verify whether or not you correctly aligned your hand.
