## **Tracker Alignment**

Ready to perform the alignment procedure for the 3D tracker:

 Verify that the GRIP chair is installed as shown with the seatback deployed and the Chest Marker Structure attached with velcro to the backrest.

**Note**: Alignment of the marker structure on the backrest is critical. Please ensure that the top edge of the marker structure is aligned with the top edge of the seatback.

• Check that the field of view of the tracker cameras is free of obstructions.

Press 'Execute' to perform alignment.

## **Action Completed Normally**

Press 'Next' to continue.

## **Action Completed with Errors**

## Press:

- 'Retry' to repeat this action.
- 'Ignore' to ignore and move on.
- 'Restart' to restart this task or select another.

**Recommendation:** Attempt 'Retry' no more than once or twice before consulting with POCC. 'Ignore' and 'Restart' should not be used without POCC autorization.
